

# Jamo®

# Jamo i300

MORE THAN JUST AN IPOD ACCESSORY

The Jamo i300, a stand-alone powered subwoofer/satellite speaker system that turns your iPod into the heart of a fully-fledged home entertainment system.

Comprising an iPod control dock, a powerful active subwoofer plus two compact satellite loudspeakers, this attractively-styled package also comes with a long range radio frequency remote control.

But this 2.1-channel system's versatility extends far beyond filling your room with tunes stored on your iPod. The control dock (which also charges your iPod) is fitted with an extra auxiliary input on its rear panel so that you can hook up your computer, portable DVD player or games

console to the system. Still got another source that you want to hook up? No problem - there's yet another input on the subwoofer itself.

How can we guarantee hi-fi quality sound? Using solidly constructed 2-way satellites helps. The speakers supplied with this system are magnetically-shielded boxes and feature a precision-engineered 76mm/3in co-axial driver that delivers truly pin-point sonic imaging and uses the same speakers as the Home Audio system.

What's more, the subwoofer has a 150 Watt high efficiency Class D digital amplifier powering an 6.5in bass driver and 2 x 75 Watt for the A 102 satellite speakers.

#### SPECIFICATIONS

	A 102	i300 SUB
<b>System</b>	2-way	Bass reflex
<b>Woofer (in/mm)</b>	3 / 76	6½ / 165

**Jamo are one of the world's leading speaker manufacturers. Sound quality and functionality are key factors in every Jamo design. Hear for yourself the difference Jamo can make.**

### **A102HCS10 SYSTEM**

This is the most compact and discreet Home Cinema Solution from Jamo - at least in terms of visual appearance. Take a listen, and you will be convinced that it is anything but subdued sonically. You will experience a level of performance unprecedented in a system this size. And that applies to both sound pressure levels and sound quality!
